

Lipo C

Lipo-C is a compounded lipotropic for injection containing a mix of Methionine, Choline, Vitamin B1 (Thiamine), and Vitamin B5 (Dexpanthenol). Lipotropics promote or encourage the export of fat from the liver by increasing the production of lecithin by the liver, thereby helping to keep cholesterol more soluble and lessening deposits in blood vessels. Lipotropics are necessary for the maintenance of a healthy liver, and for burning the exported fat for additional energy. Lipotropic nutrients enhance the liver and gallbladder's role by decreasing fat deposits and speeding up metabolism of fat and its removal.

Lipo-C injectable, 30mL (Empower formula)

LIPO-C is a favorite for patients looking to boost energy, burn fat, and protect lean muscle.

This specially compounded blend includes:

- **Methionine 15mg/Choline Chloride 50mg/L-**
- **Carnitine 50mg/B5 (Dexpanthenol) 5mg/mL**

LIPO-C is a lipotropic injection, which means it encourages fat burn to help patients work toward fat loss goals.

When combined with a healthy diet and exercise, lipotropic injections like LIPO-C have assisted patients in achieving healthier body composition.

LIPO-C is particularly effective at encouraging the body to burn fat from hard-to-lose areas like:

- **The tummy**
- **Inner thighs and buttocks**
- **Neck**
- **Hips**

LIPO-C injections are powerful and cost-effective because they go directly into the bloodstream, rather than through the digestive tract. That way, all the lipotropic blend can be used by the body.
